## Management Discussion of Performance

### Investment Objective and Strategies

The Fund's investment objective is to achieve long-term capital growth by investing primarily in equity and equity-related securities of companies located mainly outside of Canada and the United States.

The Fund follows a responsible approach to investing, as described in the Simplified Prospectus of the Fund.

### Risk

The risks associated with investing in the Fund remain as discussed in the Simplified Prospectus. The Fund is suitable for investors investing for the long term, with a medium tolerance for risk. Any changes in the Fund have not affected the overall level of risk of the Fund.

### Results of Operations

The NEI International Equity RS Fund's Series A units returned 16.6% for the twelve-month period ended September 30, 2023 compared with a return of 23.6% for the benchmark explained below.

Unlike the benchmark return, the Fund's returns are after the deduction of fees and expenses paid by the Fund. Performance differences between series of units are mainly attributable to management fees charged to each series. Refer to the Past Performance section for the details of returns by series.

The benchmark for this Fund is the MSCI EAFE NR Index (C\$).

The Fund's net asset value increased by 45.42% during the period, from \$316,739,081 as at September 30, 2022 to \$460,597,310 as at September 30, 2023. This change in net assets is attributed to net unitholder activity of \$65,677,167 and \$78,181,062 to investment operations, including market appreciation (depreciation), income and expenses.

**Market Overview**

If the first half of the year was dominated by narratives related to the resiliency of the financial system after the collapse of certain banks, the second half of the year has mostly been driven by inflationary concerns. Investors' optimism appeared to be challenged as future uncertainty became increasingly embedded in their expectations. Repercussions from interest rates being kept at higher levels, potentially for a longer period, was one of the key areas of concern. While U.S. consumer spending withstood remarkably well despite elevated inflation levels, investors questioned the consumer's resiliency going forward. Outside of the U.S., Europe and China appear to face a weaker growth momentum and a lower economic growth outlook.

**Factors That Have Affected Performance**

During the period, both stock selection and sector allocation negatively impacted the Fund's relative performance.

For security selection, holdings within Industrials, Financials but also Consumer Staples detracted the most value. However, positions within the Health Care and Consumer Discretionary sectors helped to partially offset this negative performance.

With sector allocation, the Fund's higher relative weighting in the Consumer Staples and Health Care sectors but lower relative weighting in Financials detracted from relative performance. A higher relative weighting in Industrials and the lack of exposure to Real Estate and Communication Services contributed to the Fund's performance. Lastly, given the strong performance of the Energy sector towards the second half of the period, the lack of exposure to this sector detracted from overall performance.

**Portfolio Changes**

In the fourth quarter of 2022, the portfolio sub-advisor took advantage of valuation opportunities by adding to positions in Kerry Group PLC, Daifuku Co. Ltd., Adidas AG, and Coca Cola HBC AG and crystallized gains in LVMH Moet Hennessy Louis Vuitton SE, Novo Nordisk AS, Bunzl PLC, and Linde PLC. The position in Tencent Holdings Ltd. was liquidated while a new position in Sika AG was initiated.

In the first quarter of 2023, the portfolio sub-advisor trimmed the positions in Prudential Financial Inc., LVMH, Compagnie Financiere Richemont SA, Schneider Electric SE, ING Groep NV, Allianz SE, Novo Nordisk, and liquidated Linde. Moreover, the portfolio sub-advisor added to positions in Nidec Corp., Terumo Corp., Grifols SA, and initiated new positions in Nippon Sanso Holdings Corp., Koninklijke DSM NV, and Symrise AG.

In the second quarter of 2023, the portfolio sub-advisor trimmed LVMH, Sodexo SA, Novo Nordisk, RELX PLC, MTU Aero Engines AG, and Schneider Electric and reduced the positions in Danone, Smith & Nephew PLC and liquidated Rakuten Group Inc. The portfolio sub-advisor added to Coca-Cola HBC, Kerry Group, Nidec and DSM-Firmenich AG.

In the third quarter, the portfolio sub-advisor crystallized gains and trimmed the position in Novo Nordisk while adding to QIAGEN NV and Symrise. Lastly, the portfolio sub-advisor initiated a new position in ResMed Inc., which develops, manufactures, and markets medical equipment for the treatment of sleep disordered breathing.

**ESG Activities**

The following environmental, social, and governance (ESG) activities are some of those undertaken during the period related to the Fund's investment objectives and strategies.

NEI's Responsible Investing & ESG Services team (RI team) engaged 10 companies including LVMH, Danone, and Nestlé SA, on topics such as supply chain risks, equitable access, and the circular economy.

The RI team voted against management on 8% of the proxy items at 46 annual general meetings. They also voted against all four shareholder resolutions filed on ESG topics such as product pricing and share repurchase programs. Votes against shareholder resolutions were consistent with NEI's Proxy Voting Guidelines.

## Recent Developments

The portfolio sub-advisor's investment approach is long-term oriented and structured to take advantage of the undervaluation of high-quality companies. The investment philosophy and process are focused on secular and sustainable growth themes that can be leveraged by global players with key competitive advantages and strong management teams. The portfolio sub-advisor encompasses the ESG-related factors into all points of its fundamental analysis and invests across a variety of growth themes to improve resilience through diversification.

The portfolio sub-advisor continues to assess the ongoing concerns that affect the companies' operations and remains alert on opportunities that would improve the Fund's risk-return profile.

The term of Marie Rounding ended on September 30, 2023. Ms. Rounding has served with distinction on the Independent Review Committee ("IRC") since 2014. After consulting with the Manager, the IRC determined it would replace Ms. Rounding with Caroline Cathcart. Ms. Cathcart was appointed as a new IRC member effective October 01, 2023, for a one-year term. As Ms. Rounding acted as the IRC chair after her term ended, Ms. McCarthy was appointed IRC Chair, effective October 5, 2023, and replaced Ms. Rounding in this role.

(1) All per unit figures presented in 2023 are referenced to net assets determined in accordance with IFRS and are derived from the Fund's audited annual financial statements for the period ended September 30, 2023.

(2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.

(3) Distributions were paid in cash or reinvested in additional units of the Fund.

(4) Distributions (if any) that may have been made that included return of capital in excess of short term earnings were made to minimize disruption and provide stability to investors who have elected to take their distributions in the form of cash, and as disclosed in the Simplified Prospectus. These amounts are reviewed at each calendar year-end and management engages in discussions with the sub-advisor to determine the most applicable strategy on a go forward basis and will take any action(s) as needed for the long term stability of the Fund.

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs, as well as withholding taxes) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

(3) The portfolio turnover rate indicates how actively the Fund's sub-advisor manages its investment holdings. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.

(4) At the close of business on April 16, 2021, the NEI International Equity Fund was merged into the NEI International Equity RS Fund. The portfolio turnover rates exclude the value of securities acquired and sold to realign the Fund's holdings.

## Management Fees

The Manager is responsible for the management, supervision and administration of the Fund. The Manager receives from the Fund management fees, before HST, calculated daily on the net asset value of the Fund at an annual rate shown below. The Fund does not pay management fees for Series I and O units. Series I and O unitholders pay a negotiated fee directly to NEI Investments.

The management fee covers the cost of investment advisory fees, sales, marketing, and distribution expenses of the Fund. In addition, the Manager may pay a trailer fee to dealers out of this management fee. The trailer fee is a percentage of the average daily value of the units of the Fund held by the dealer's clients. No trailer fees are paid in respect of any Series F and PF units of the Fund.

The following table shows the major services paid for out of management fees as a percentage of the management fee for all applicable series of the Fund:

	Management Fee (%)	Investment Advisory and Other Fees (%)	Trailer Fee (%)
Series A	1.80	48.17	51.83
Series F	0.80	100.00	N/A
Series P	1.70	41.17	58.83
Series PF	0.70	100.00	N/A

## Past Performance

The performance information provided will not necessarily indicate how the Fund will perform in the future. The information shown assumes that distributions made by the Fund in the periods shown were reinvested in additional units of the relevant series of the Fund. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

### Year-by-Year Returns

The following charts show the annual performance for each series of units of the Fund for each period shown and illustrate how the Fund's performance has varied from period to period. The charts indicate how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

## Annualized Compound Returns

The following table shows the annual compound returns for all series of the Fund. All returns are in Canadian dollars, on a total return basis, net of fees. For comparison, the returns for the benchmark are included. A discussion regarding the relative performance of the Fund is found in the Results of Operations section of this report and a description of indexes can be found in the Annualized Compound Returns section of this report.

The benchmark for this Fund is the MSCI EAFE NR Index (C\$).

The MSCI EAFE Index is composed of over 1,000 large company stocks from over 20 of the world's industrialized nations. It does not include stocks issued in North America.

While the Fund uses this benchmark for long-term performance comparisons, it is not managed relative to the composition of the Index. As a result, the Fund may experience periods when its performance is not aligned with the Index, either positively or negatively. Please see the "Results of Operations" section of this report for a discussion of recent performance results.
